

# THE ULTIMATE POSING GUIDE

# How to Walk in Front of the Camera

The past few days I've taught you:

- 1. The Foundations of Posing
- 2. How to Make Your Portraits NOT Cheesy
- 3. Posing Your Hands and Eyes

So you won't be the close to 40% of brides who have regrets with their wedding photographer. Crazy thing is... at this point you may know more about posing than most "professional" wedding photographers out there lol.

Today I'll teach you the correct way to WALK in front of the camera.

So for the camera, the female has to have the back of heel in front of her foot and this will change the weight distribution in your hips making it look much more flattering in the portrait.

Look at the portrait above! That's the exact technique I had Charly and Nausheen do.
